Objective

I am seeking an opportunity to join a development team where, with strong team spirit and effective communication, I can apply my technical knowledge to add value to the company while continuously enhancing my skills.

I am a Portuguese citizen passionate about technology. As a proactive individual, I am constantly looking to expand and refine my knowledge through courses on various platforms such as academy.uipath, balta.io, desenvolvedor.io, Udemy, DIO, YouTube, Microsoft learn and so on.

Education

Jan/2022 – Jun/2024	Technologist in Systems Analysis and Development <i>UNIAVAN - Avantis University</i>
Jan/2018 – Dez/2020	Postgraduate Degree in Labor and Social Security Law <i>PUC-Minas – Pontifícia Universidade Católica de Minas Gerais</i>
Jul/2011 – Ago/2016	Bachelor of Laws <i>UNIVALI – Universidade do Vale do Itajaí</i>

Experience

Aug/2024 - today

Devoteam

I was responsible for leading process automation initiatives using Power Automate (Cloud and Desktop) and UiPath. I actively participated in discovery and assessment meetings with stakeholders to identify automation opportunities and contributed to the creation of Product Design Documents (PDDs).

I developed RPA solutions integrated with **Dataverse** and **SharePoint Lists** to optimize workflows and ensure efficient background interactions. Additionally, I leveraged AI Builder and OCR for data extraction and manipulation within automated flows.

I conducted unit testing and User Acceptance Testing (UAT) to validate automations prior to production deployment, ensuring both quality and stability. I was also in charge of monitoring and maintaining automations in the production environment, including the optimization of undocumented legacy code for improved performance and readability.

To manage tasks, I used JIRA to plan and track sprints, following an Agile methodology with daily and weekly meetings. I also trained clients and team members on Power Automate best practices, promoting greater efficiency and effectiveness in automation projects.

Furthermore, **I created a Power Automate framework inspired by UiPath** best practices, which standardized and accelerated automation development. I also developed a scheduling template for automation execution, making it easier for clients to manage and monitor automated activities.

Jan/2023 – Jun/2024

BRF S.A.

- 'RPA Developer', performing maintenance, development, testing, monitoring and deployment of automated processes with the UiPath technology, using programming languages VB.net and/or C# and the relational language SQL Server, observing the 'Agile' methodologies for better use/performance of the Tools; and
- 'Business Analyst', acting as an intermediary between the Product Owner and the Key User, conducting meetings to understand and automate processes. Use of Bizagi software to map projects according to BPMN; production of documentations such as 'Project Design Document', Robot Manuals and Qualifications (FTE Mapping). Contributions to process improvement and responsible for updating the Automation Backlog.

Other Courses

UIPATH – Automation Developer Professional Certification (UiPath-ADPv1)

UiPath

MICROSOFT – Create and manage automated processes by using Power Automate (APL-7002)

Power Automate; SharePoint; Office Online Business

MICROSOFT – Power Automate RPA Developer Associate (PL-500)

Microsoft Power Platform; Power Automate Cloud; Power Automate Desktop; Custom connectors; AI Builder

MICROSOFT – Power Platform Fundamentals (PL-900)

Power Platform; Power Automate; Power Pages; Power Virtual Agents; Power BI; Power Apps

UDEMY – Jira Software: projetos completos com Scrum

Ágile, Sprint, Scrum, Jira

UIPATH – Business Analyst Foundation

UiPath

UIPATH – RPA Developer Foundation

UiPath

BALTA - Modelando Domínios Ricos

OOP; DDD (Domain-Driven Design); CQRS (Command and Query Responsibility Segregation); SOLID, Clean Code; Design by Contracts; Fail-Fast Validations; Repository Patterns

BALTA - Fundamentos do ASP.NET 6

API build; Autentication and autorization; Services development; API Documentation with Swagger

BALTA – Fundamentos do Entity Framework

MVC (Model, View and Controller); C.R.U.D. (Create, Read, Update and Delete)

BALTA - Fundamentos C#

C#; .NET

BALTA - Fundamentos do SQL Server

Microsoft SQL Server

UDEMY - C# COMPLETO Programação Orientada a Objetos

C#, POO, ASP .NET Core MVC, Entity Framework, Git, MySql

DIO - Geração Tech Unimed-BH - Ciência de Dados

Python, POO, Pandas Library, SQL, noSQL, Cloud Computer, Machine Learning

DIO - Santander Bootcamp Fullstack Developer

JavaScript, TypeScript, POO, Angular, HTML5, CSS3

UDEMY – Git e GitHub essencial para o Desenvolvedor

Git basic to advanced

Languages

English – Advanced

Spanish – Basic

Portuguese – Fluent
