Objective

I'm a Portuguese citizen looking for an opportunity to join a team of developers, and, with a team spirit and good communication, apply all my knowledge in technologies, in order to add more value to the products produced by the hiring company and increasingly improve my technical knowledge.

Education

2022 – 2024

Technologist in Systems Analysis and Development
UNIAVAN - Avantis University

Experience

Jan/2023 – Jun/2024

BRF S.A.

- *'RPA Developer'*, performing maintenance, development, monitoring and deployment of automated processes with the UiPath technology, using programming languages VB.net and/or C# and the relational language SQL Server, observing the 'Agile' methodologies for better use/performance of the Tools; and

- *'Business Analyst'*, acting as an intermediary between the Product Owner and the Key User, conducting meetings to understand and automate processes. Use of Bizagi software to map projects according to BPMN; production of documentations such as 'Project Design Document', Robot Manuals and Qualifications (FTE Mapping). Contributions to process improvement and responsible for updating the Automation Backlog.
